## Education

**Bachelor in Computer Application,**  
*Lovely Professional University*

08/2016 – 07/2019 | Jalandhar, India

**Masters in Computer Application,**  
*Lovely Professional University*

08/2019 – 07/2021 | Jalandhar, India

## Professional Experience

**Developer, Straive**

08/2021 – present | Chennai, India

In 6 months of internship I worked on an Video call application with Flutter as front-end and Node for signalling server. I used WebRTC for peer to peer connections. On boarded full in February and worked with .net. My responsibility was to create and maintain APIs for PRISM. I shifted to React Js and been woking for a year now.

## Skills

React Js	● ● ● ● ●	Node	● ● ● ● ●
Redux	● ● ● ● ●	Express	● ● ● ● ●
Javascript	● ● ● ● ●	SQL	● ● ● ● ●
WebAPI	● ● ● ● ●	.Net	● ● ● ● ●
PostgreSQL	● ● ● ● ●		

## Projects

**INTERPRETER APPLICATION, Video Conferencing App**

02/2021 – 08/2021

This application was prototype of Interpreter application which allowed to connect with two non similar language person to a third person who knew both the languages to interpret for both of them via video conferencing. I solely created the application with Flutter as frontend & Node js for signalling service. WebRTC was used to connect all the connections. The good thing about WebRTC is it enables peer to peer connection once the both peers are connected.

**PRISM**

09/2021 – 02/2022

I worked on this platform with .Net(c#) with PostgreSQL. The responsibility I had to create and maintain apis for PRISM with MVC architecture pattern.

**FMS-Freelancer Managment Service, Freelancing Service**

03/2022 – present

FMS is developed and managed by Straive. FMS helps to schedule and plan the task of the freelancers. Freelancers and see their allocation, download the project, submit invoices etc. The development stack which is used in FMS is React Js as frontend and backend as PHP with database as SQL.
